SUPPLIER DISPATCH MANIFEST — FIVE EMAILS READY, NONE SENT

1. What this is

SUPERSEDED-BY §BH46: the system never contacts suppliers; this manifest is kept as history and nothing in it is to be sent.
Five composed email files, ready for the owner to send by hand.
Creating an .eml file is NOT dispatch. Nothing has been sent, no SMTP is configured, and supplier_requests_sent remains 0.
No sent timestamp, message ID or delivery receipt exists, and none has been invented.

{
 "supplier_requests_sent": 0,
 "message_count": 5,
 "attachments_total": 0,
 "no_mail_was_sent": true,
 "no_smtp_configured": true
}

2. Destinations — owner-approved, official public contact pages

Liquid Bottles LLC: Info@LiquidBottles.com
SKS Bottle & Packaging: Customersupport@sks-bottle.com
BottleStore / O.Berk: customerservice@bottlestore.com
Premium Vials: support@premiumvials.com
Nicer Packaging: sales@nicerpackaging.com

5. Message integrity

Each body is the approved text with only three edits: the supplier name, the contact greeting and a signature placeholder. Removing those three restores the approved body exactly, which is how 'no substantive wording changed' is proven rather than claimed.

{
"approved_base_body_sha256": "08f0ccab76b48ecb431cfd8db91e90750c0c514330ec244a558921fceaf90655",
"approved_base_body_length": 2661,
"substantive_wording_unchanged_in_all": true
}

6. How to send

open each .eml in your normal email client
verify the To address against the manifest
replace the From placeholder with your sending address
replace [YOUR NAME], [YOUR ROLE] and [YOUR EMAIL] in the signature
send it
keep the sent message or its message ID
return that evidence so each request can be logged individually

{
"do_not_change": "any other wording in the body. The manifest records the approved hash, and returned evidence is checked against it.",
"status_will_become": "EVIDENCE_VERIFIED, per message, when sent-message evidence is returned and passes the validator's eight checks; supplier_requests_sent moves only from the owner's typed sent date on the tracking sheet, transcribed by ruling"
}
