PALT-P1 STANDARD 9-PAN EYESHADOW PALETTE — NEUTRAL GEOMETRY REVIEW BOARD

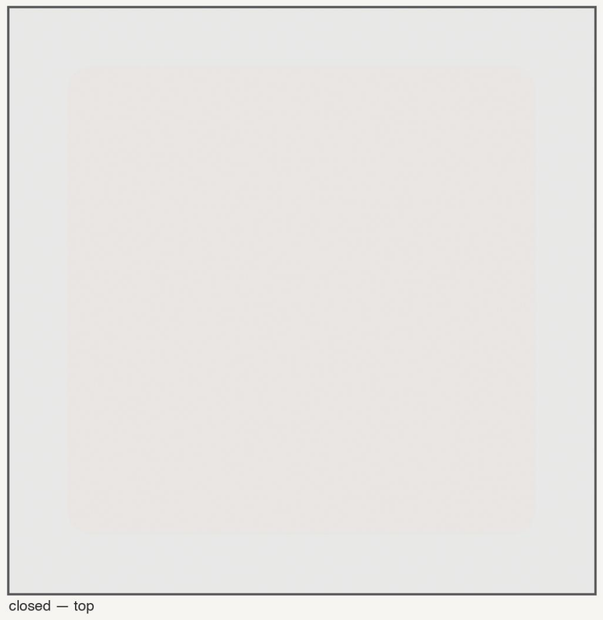

envelope 116.0 x 116.0 x 15.0 mm — PROVISIONALLY_APPROVED_FOR_GEOMETRY_DEVELOPMENT | PALT_P1_FINAL_DIMENSIONS: NOT_APPROVED | PALT_P1_MANUFACTURING_AUTHORITY: NOT_ESTABLISHED | PALT_P1_OWNER_APPROVAL: PENDING_VISUAL_REVIEW
neutral clay geometry validation only — no powder realism, no glitter, no cosmetic colour, no artwork, no beauty render
33 independently generated components; OPEN and CLOSED share identical component identities by construction (the lid group is articulated, never re-authored)
hinge WALL_INTEGRATED_PIN_HINGE at TOP_EDGE · clasp WALL_INTEGRATED_SNAP_CLASP at BOTTOM_EDGE · opening UPWARD · front artwork CLASP_AT_BOTTOM · open review angle 110.0 deg (DESIGN_DEFAULT, NOT_MANUFACTURER_CONFIRMED)

ENGINEERING STRESS FIXTURE

ENGINEERING STRESS FIXTURE — not a recommendation

RESOLVED DIMENSIONS (from the contracts, never eyeballed)

pan	26.0 dia x 3.5 deep
pocket	26.6 dia (pan + 2 x 0.30 tolerance)
pitch / gap / margin	30.6 / 4.0 / 5.0
case / hinge / clasp wall	2.0 / 3.2 / 3.0
base / lid height	7.8 / 7.0
parting gap	0.2
height stack (lower / eng / premium)	9.0 / 11.15 / 13.85
validators	0 findings — valid=True
mesh diagnostics	33 components, 15456 faces, all manifold

PREMIUM vs STRESS FIXTURE

premium envelope: 116.0 x 116.0 x 15.0 mm (gap 4.0, margin 5.0)
stress fixture: 101.3 x 103.5 x 15.0 mm (gap 2.0, margin 3.0)
the stress fixture is the wall-integrated analytical minimum — NOT_PRODUCT_RECOMMENDATION, NOT_OWNER_APPROVED
it exists only to show the margin, spacing and mechanism clearance the premium envelope buys

evidence: docs/roadmap/palt_m4/ · geometry authority PROVISIONAL_DESIGN_ONLY · MANUFACTURING_AUTHORITY NOT_ESTABLISHED · not self-approved
